J. H. JOHNSON, Editor.

The Proprietors of the Commonwealth, grateful for the generous patronage which has been bestowed upon them, are determined to furnish their patrons a journal which shall be unexcelled in any of the departments which comprise a first class newspaper.

Published at the Capital of the State, it will be enabled to furnish its readers with the latest intelligence of the actions of the higher courts and of the various departments of the State. It will also contain the latest telegraphic news of stiring events, and also of the New York, Cincinnati, Louisville and New Orleans markets.

In politics the Commonwealth will be conservative, occupying a middle and antagonistic ground in reference to the two extremes. The old parties broken up, and old issues virtually dead, the vital question at present is Union or disunion. The Commonwealth is for the Union, believing it to be the greatest safeguard for our rights, as well as our most effective auxiliary in our efforts to obtain redress for our wrongs. Its conductors do not regard disunion as a remedy for any of the wrongs of the South, but rather an aggravation. It will contend for the equality of the States in the Union, and for the absolute non-interference by Congress with the domestic affairs of the States and Territories.

We shall aim to make the Commonwealth an acceptable and appropriate fireside companion. It will contain selections from the choicest literature of the day, prose, poetry, &c.

The WEERLY will be printed on extra double medium paper, in new and beautiful type. Terms, in advance, for the Tri-Weekly, \$4 per

Terms, for the Weekly \$2 per annum.

# Fever and Ague,

from which mankind suffer over a large part of the globe, is the consequence of a diseased action in the system, induced by the poisonous miasm of vegetable decay. This exhalation is evolved by the action of solar heat on wet soil, and rises with the watery vapor from it. While the sun is below the horizon this vapor lingers near the earth's surface, and the virus is taken with it through the lungs into the blood. There it acts as an irritating poison on the internal viscera and excreting organs of the body. The liver becomes torpid and fails to secrete not only this virus, but also the bile from the blood. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the instinct of our organism, as if in an attempt to expel the noxious infusion, concentrates the whole blood of the body in the internal excretories to force them to cast it out. The blood leaves the surface, and rushes to the central organs and rushes to the central organs and rushes to the central organs and rushes to the surface, as if in another effort to expel the irritating poison through that other great excretory—the skin. In this also it fails, and the system abandons the attempt exhausted, and waits for the recovery of strength to repeat the hopeless effort another day. These are the fits or paroxysms of Fever and Ague. to repeat the hopeless effort another day. These are the fits or paroxysms of FEVER AND AGUE. Such constitutional disorder will of course undermine the health if it is not removed.

We have labored to find, and have found, an

Ayer's Ague Cure,

which neutralizes this malarious poison in the blood, and stimulates the liver to expel it from the body. As it should, so it does cure this afflicting disorder with perfect certainty. And it does more, or rather does what is of more service to those subject to this infection. If taken in season it expels it from the system as it is absorbed, and thus keeps those who use it free from its attacks; keeps the system in health although exposed to the disease. Consequently it not only cures, but protects from the great variety of affections which are induced by this malignant influence, such as Remittent the great variety of affections which are induced by this malignant influence, such as Remittent Fever, Chill Fever, Dumb, or Masked Ague, Periodical Headache, or Bilious Headache, Bilious Fevers, Neuralgia, Rheumatism, Gout, Blindness, Toothache, Earache, Catarth, Asthma, Palpitations, Painful Affections of the Spleen, Hysterics, Colic, Paralysis, and Painful Affections of the Stomach and Bowels, all of which, when arising from this cause, will be found to assume more or less the intermittent type. This "AGUE CURE" removes the cause of these derangements, and cures the disease.

This it accomplishes by stimulating the excretories to expel the virus from the system; and these organs by degrees become habited to do this their office of their own accord. Hence arises what we term acclimatation. Time may accomplish the same end, but often life is not long enough, or is sacrificed in the attempt, while this "AGUE CURE" does it at once, and with safety. We have great reason to believe this is a surer as well as safer remedy for the whole class of diseases which are caused by the miasmatic infection, than any other which has been discovered; and it has still another important advantage to the public, which is, that it is cheap as well as good. This it accomplishes by stimulating the excre-
